THE USE OF EFT IN WORK
WITH COUPLES

April 24th, 2016
Sunday
Queens Hospital Center
11:00 a.m. – 1:00 p.m.

Presented by Janice Gross, LCSW-R, specialist in couples therapy, presents CE seminars on Engaging Couples in Therapy, and president of Staten Island Chapter of NYSSCSW

EFT was developed by Dr. Susan Johnson, Ed.D, CP, Psych as a model of couples therapy that focuses on emotion and relatedness as the focus of change. She built her concepts around Attachment Theory developed by John Bowlby which applies to all humans. In her model, she provides a clear roadmap of stages and steps in achieving the goals of closeness. This therapy is highly experiential, focusing on present moment; with the therapist working as a process consultant. The presentation will explain the model and relate it to case material.

Location:
Queens Hospital Center
82-68 164th St.
Jamaica, NY 11432
Room: A540

Light refreshments will be served
